linguistics an introduction to linguistic theory is a textbook written for introductory courses in linguistic theory for undergraduate linguistics majors and first year graduate

students by twelve major figures in the field each bringing their expertise to one of the core areas of the field morphology syntax semantics phonetics phonology and language acquisition in each section the book is concerned with discussing the underlying principles common to all languages showing how these are revealed in language acquisition and in the specific grammars of the world s languages key book features written by twelve linguists all internationally recognized as leaders in their fields of specialization exercises and data analysis problems within and at end of each chapter help students learn what it means to actually do linguistics includes the latest developments in theoretical linguistics for example optimality theory other pedagogical tools include extensive glossary of key terms chapter summaries further reading lists

language and context breaks new ground in our understanding of the relationship between register genre and context leckie tarry argues convincingly and engagingly for a functional theory of language which specifies register in terms of contextual and linguistic features and which suggests a discursive relationship between the two moving beyond the limits of much of today s theory this accessible volume develops a theoretical understanding of the relationship between text context langage function and linguistic form helen leckie tarry a specialist in the area of register and applied linguistics died in 1991 aged 49 although she had finished a large part of this work her notes and draft chapters have been extensively edited by professor david birch david birch is currently professor of communication and media studies at central queensland university australia and previously taught at murdoch university western australia and the national university of singapore

in linguistic theory robert de beaugrande analyses linguistic theories not as abstract ideas or theses but as the process and product of theoretical discourse he argues that the best documentation of this discourse can be found in the fundamental works of major linguists from ferdinand de saussure to teun van dijk and walter kintsch he therefore employs the highly unusual strategy of a close reading of these works as discourse performances and strives to uncover their main points and characteristic moves in the linguist s own words through this approach the reader is able to appreciate and understand the variety and controversy among linguistic theories as they have emerged and developed in interaction with each other special scrutiny is allocated to the issue of how far the active practice of the linguists followed their own theories and proposals and why the author concludes by assessing the prospects for linguistics to be drawn from the retrospect in the previous chapters

written by two of the foremost researchers in the field the book benefits from their insight into conceptual issues their understanding of experimentation and their own pioneering research

linguistic theory in america

this monograph has as its objective to give a critical survey of the development of the theories concerning the essence the function and the most characteristic determining features of language and to explore and evaluate the motive forces responsible for this development the author explains mainly the progressive elements of the theoretical foundations and methodological procedures of different times and schools trends and places them in the process which presents the course of development of linguistic theory as an organic whole he deals in detail with the foreign mainly american and hungarian monographic publications based on so called modern methodologies and in the light of the facts of language points out the theoretical gnoseological philosophical errors which of course are errors from the point of view of general linguistics too he relies on a marxist based interpretation of the modern concept of natural and social law for the formulation of his own conception of linguistic law which includes also his own view of linguistics structures

this volume presents essays by some of the leading figures in the vanguard of theoretical linguistics within the framework of universal grammmar one of the first books to adopt the minimalist framework to syntactic analysis it includes a central essay by noam chomsky on the minimalist program and covers a range of topics in syntax and morphology contributors luigi burzio héctor campos noam chomsky joseph e emonds robert freidin james harris ray jackendoff paula kempchinsky howard lasnik claudia parodi carlos piera a carlos quicoli dominique sportiche esther torrego

this two volume work examines every aspect of language change and two centuries of linguistic approaches towards understanding it the enterprise opens with a consideration of the nature of language and what constitutes language change gary miller argues that a single overarching theory is insufficient to encompass the protean mix of linguistic social political and cognitive factors involved in linguistic diachrony he analyzes general processes of phonetic phonological morphological and syntactic change and explores their origins causes and effects to support his analyses he provides detailed case studies of such phenomena as the middle english vowels the history of english do and development of the feminine gender in indo european he offers a balanced approach to the effects of first language acquisition describes

general and specific processes including grammaticalization and creolization and examines the role of differential rates of change in regional and dialectal variation he reveals that several fundamental concepts in historical linguistics are much older than conventionally assumed in its comprehensive approach and great linguistic and historical range this is a contribution of enduring use and value to historical linguistics and linguistic theory volume i examines topics involving change in different components of the grammar from the perspectives of theory acquisition variation and motivation gary miller investigates traditional concerns such as variation and lexical diffusion and considers their impact on contemporary issues he discusses the interaction of articulatory and perceptual factors the implications of naturalness for expected changes and the consequences of alterations of syllable timing for contemporary theory the volume closes with a description of and motivations for vowel shifts in volume ii the focus turns to morphological and syntactic language changes by most theoretical accounts morphology is not autonomous but interacts with at least three other domains i phonology and perception ii the lexicon culture and iii syntax having addressed the first of these extensively in volume i gary miller illustrates the second with the rise of the feminine gender in indo european and the third by documentation of the changes from latin to romance in the coding of reflexive anticausative middle and passive he shows how syntactic change is micro parametric and is typically motivated by changes in lexical features including the numerous shifts from lexical to functional content as well as changes within functional categories finally he considers the genesis of creole inflectional derivational and syntactic categories involving the interaction of contact phenomena with morphological and syntactic change

in a controversial look at the study of linguistics today mortéza mahmoudian examines twentieth century theories of language in light of empirical evidence in the past linguists have had to choose between a general linguistic theory aimed at universal explanatory power and specific limited linguistic models arguing that at various levels of linguistic analysis different theories offer more or less explanatory power mahmoudian makes a persuasive case for an integrated approach incorporating the strengths of both methods the author begins with the identification of principles which despite differences in terminology are held in common by most twentieth century linguists he shows the implications merits and shortcomings of the major schools of linguistic thought as well as the techniques one can use in gathering data ranging over a wide variety of international linguistic thinking mahmoudian takes up the question of what he calls experimentation or the extent to which the application of certain

linguistic theories have validity in constucting models simultaneously a survey of the current state of linguistic theory and a case for the necessity of empirical verification in linguistics modern theories of language builds a bridge across the gulf between many long standing conflicts in the theory of language accessibly written this provocative work predicts future theorerical and epistemological developments and will prove essential reading for students and scholars of linguistics as well as specialists in cognitive psychology and romance languages

written by two of the foremost researchers in the field the book benefits from their insight into conceptual issues their understanding of experimentation and their own pioneering research
